

# INCORPORATING INTERSECTIONAL GENDER ANALYSIS INTO RESEARCH ON INFECTIOUS DISEASES OF POVERTY:

A toolkit for health researchers

This toolkit aims to strengthen the capacity of researchers working on infectious diseases by incorporating an intersectional gender approach.

The objectives of this document are to:

Strengthen the **research capacity** of disease-affected countries in **intersectional gender approaches**

Understand and address barriers to **effective and quality** implementation of **health interventions** oriented to prevent and control **infectious diseases**

Explore solutions for enhancing **equality** in access to quality **health care**

World Health  
Organization

or research on  
diseases of poverty

UNICEF • UNDP • World Bank • WHO

# Structure of the toolkit

01

Module 1: provides an overview of the role and importance of gender and intersectionality for research on infectious diseases of poverty.

02

Module 2: gives an overview of different approaches to incorporating an intersectional gender lens.

03

Module 3 and Module 4: describe intersectional gender analysis activities at the research design and development phase, which includes developing a research protocol.

04

05

Module 5: explores how research methods can be used to transform inequitable gender power relations.

06

Module 6: describes gender considerations and best practices within data collection.

07

Module 7: discusses how an intersectional gender lens can be incorporated into the analysis of quantitative and qualitative data.

08

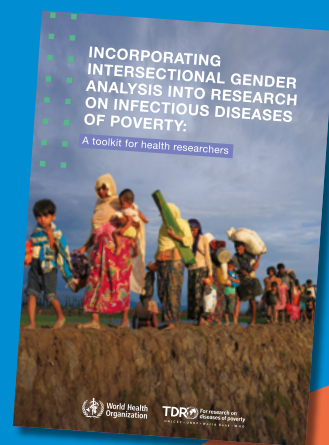

Module 8: focuses on how to incorporate an intersectional gender lens into implementation research on infectious diseases of poverty.

09

Module 9: explores how an intersectional gender lens can be used in the reporting and dissemination of research on infectious disease of poverty.

The toolkit contains a collection of training modules that can be customized for different contexts.

There are two introductory modules, after which, modules mirror the research process in terms of the design and development of the research, data collection, analysis, and reporting and dissemination.

Key resources related to the specific gender analysis activities are included in each module. Each module ends by listing reflection questions/action items.
