

# GSK's Global Health: Who we are and what we do

## Our 3-pronged approach

GSK's Global Health team aims to **change the trajectory of high burden diseases in lower-income countries** with a focus on prevention and treatment of infectious diseases

We have a dedicated Global Health team of more than **200 outstanding people**

*Image: Jose Ignacio, Scientist, GSK Tres Cantos Site, Spain*

### Global Health R&D

**Developing new medicines & vaccines** against high burden infectious diseases in lower-income countries

### Access

Pursuing equitable access to **GSK's portfolio & pipeline**

### Health System Strengthening

Improve health equity for **communities who need it most**, through catalytic partnerships

# GSK PARTNERING WITH TDR

## 20 TDR-supported fellows contributed to the development of the RTS,S malaria vaccine

Dr Clara Agutu

### African CRDF Fellows who have contributed to RTS,S development

Aumini	Country
